CRC CARD

<i>User</i>	
<ul style="list-style-type: none">- Username- Major- School- Current Year- Resume- Profile Pic- Phone number- Register as a user- Log in- Search Chatroom by course code, semester, year- Set as a professor enrolled in course- Set as a TA enrolled in course- (Default – student enrolled in course)- Inside chatroom, set as chatroom manager (by other managers)- Enroll into chatroom to communicate with fellow classmates- Check chatting histories- Chat in chatroom [casually with classmates]- Post questions- Answer questions- Click on other registered users- Send private messages to other users- Adopt an answer to resolve post- Has the ability to adopt an answer to be able to resolve post- Search for posts in chatrooms through keywords- Send messages anonymously- Filters unwanted posts [or not as important posts] in chatrooms- File complaints on inappropriate posts	<ul style="list-style-type: none">ServerLoginSignUpProfileChatroomPostCrowdSourcing

<ul style="list-style-type: none"> - Access all functionality in app - Cannot hack in using CSS Injection 	
Chatroom	
<ul style="list-style-type: none"> - Course (for that chatroom) - All [enrolled] Users (inside chatroom) - Chatroom admins (mediators/managers) - Keep track of historic posts - Notify all users about alerts/important posts - Keep track of posts that are alerts/important posts - Private Messaging (PM) with other users in the chatroom - Collect tags from collection of posts 	User Server

Post	
<ul style="list-style-type: none"> - Post Content - Date posted - User association of post - Save post in database - Resolved post with utilization and adoption of an answer 	User Chatroom Server

CrowdSourcing	
<ul style="list-style-type: none"> - Upload file to server - Download file from server - Sharing file with other user 	User Controller[s]

Sign Up	
<ul style="list-style-type: none"> - Obtain username - Obtain first name - Obtain last name - Obtain password - Obtain UTORid 	User Server Controller[s]

- Create new user using this info	
-----------------------------------	--

Login	
- Obtain username	User
- Obtain password	Server
- Authenticate within databases using username and password	Controller[s]

ProfilePage	
- Upload and set profile picture	User
- Set first name and last name	Controller[s]
- Change first name and last name	
- Upload resume	
- Set major	
- Change password	

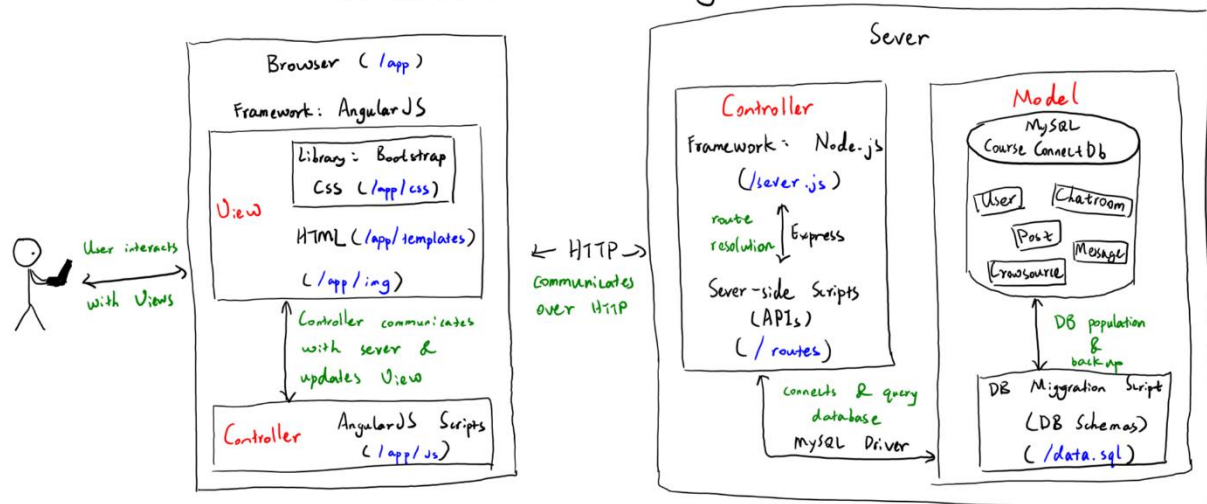

LandingPage	
- Navigate to another portion of the application (gateway to user profile and chatroom[s])	User Controller[s]

Server	
- Connects to database	User
- Connects to frontend	Controller[s]
- Authenticates HTTP requests	
- Returns HTTP response	
- Sends errors when needed	

Controller	
- Response to user interaction	Server
- Communicate with server
